Daikin One touch smart thermostat

Daikin One+ smart thermostat

Daikin One lite connected thermostat

## DAIKIN ONE CLOUD SERVICES

PEACE OF MIND

COMFORT & EFFICIENCY

CONTROL

Your local Daikin *Pro* contractor can now offer you an automated remote access option for your Daikin comfort system. If you are already using the Daikin *One* Home mobile app to control your home's thermostat, you can now authorize your contractor to remotely access your comfort system's performance (via the Daikin Cloud) to provide you with extra peace-of-mind, comfort, efficiency, and control.

### Peace Of Mind

- » When you authorize remote access of your system, you get peace of mind that diagnostic data about many system issues are available to your contractor remotely.
- » With remote access, issues with your system can be identified and diagnosed remotely, often before you are even aware of an issue.
- » In many cases, contactless service is possible since service and adjustments to your system can be made remotely, without sending a technician into your home. Whether it is a small change to your thermostat schedule; or a more technical system adjustment, your contractor can access your system remotely, and you don't even have to be home!

### Comfort and Efficiency

- » Comfort systems that are not operating properly have more service needs, reduce your level of comfort, and don't run efficiently. Remote access can help ensure your system is always delivering the comfort you expect.
- » System performance is a major contributor to operating efficiency, and higher operating efficiencies can help lower your utility costs. Remote access can help keep your system efficient and those utility costs in check.

## You will always be in control

- » **Choose what level of access to give your contractor**, either view only or view and adjust system data only or full remote adjustment. You can even choose to allow remote access for a brief 2-hour window when service is called for.
- » **Your data is always protected and safe.** Your data privacy and protection is our highest priority. You can end your contractor's remote access at any time.

## To sign up:

1. Provide us with the email address you used when you registered your Daikin *One* Home mobile app.
2. Soon you will receive a notification on the app, asking you to join.
3. Accept the invitation, select what level of access, view only or view and adjust as you prefer.

## Here's how to accept the Daikin *One* Cloud Services invitation:

- » Make sure your Daikin *One* Home mobile app is upgraded to the latest version (v2.1 or higher)
- » Follow the steps (see below) and enjoy!

For more information, ask your Daikin *Pro* contractor or visit [www.daikinone.com](http://www.daikinone.com) today!

Our continuing commitment to quality products may mean a change in specifications without notice.
